TENCompetence Project Aim

- Building The European Network for Lifelong Competence Development
- To be used by any individual, school, team or organisation that has a need to (further) develop the competences (of their members) in a formal and/or informal way
- The system will integrate and develop open source software based on the principles of web services (demonstrated with various clients (rich clients, web clients))

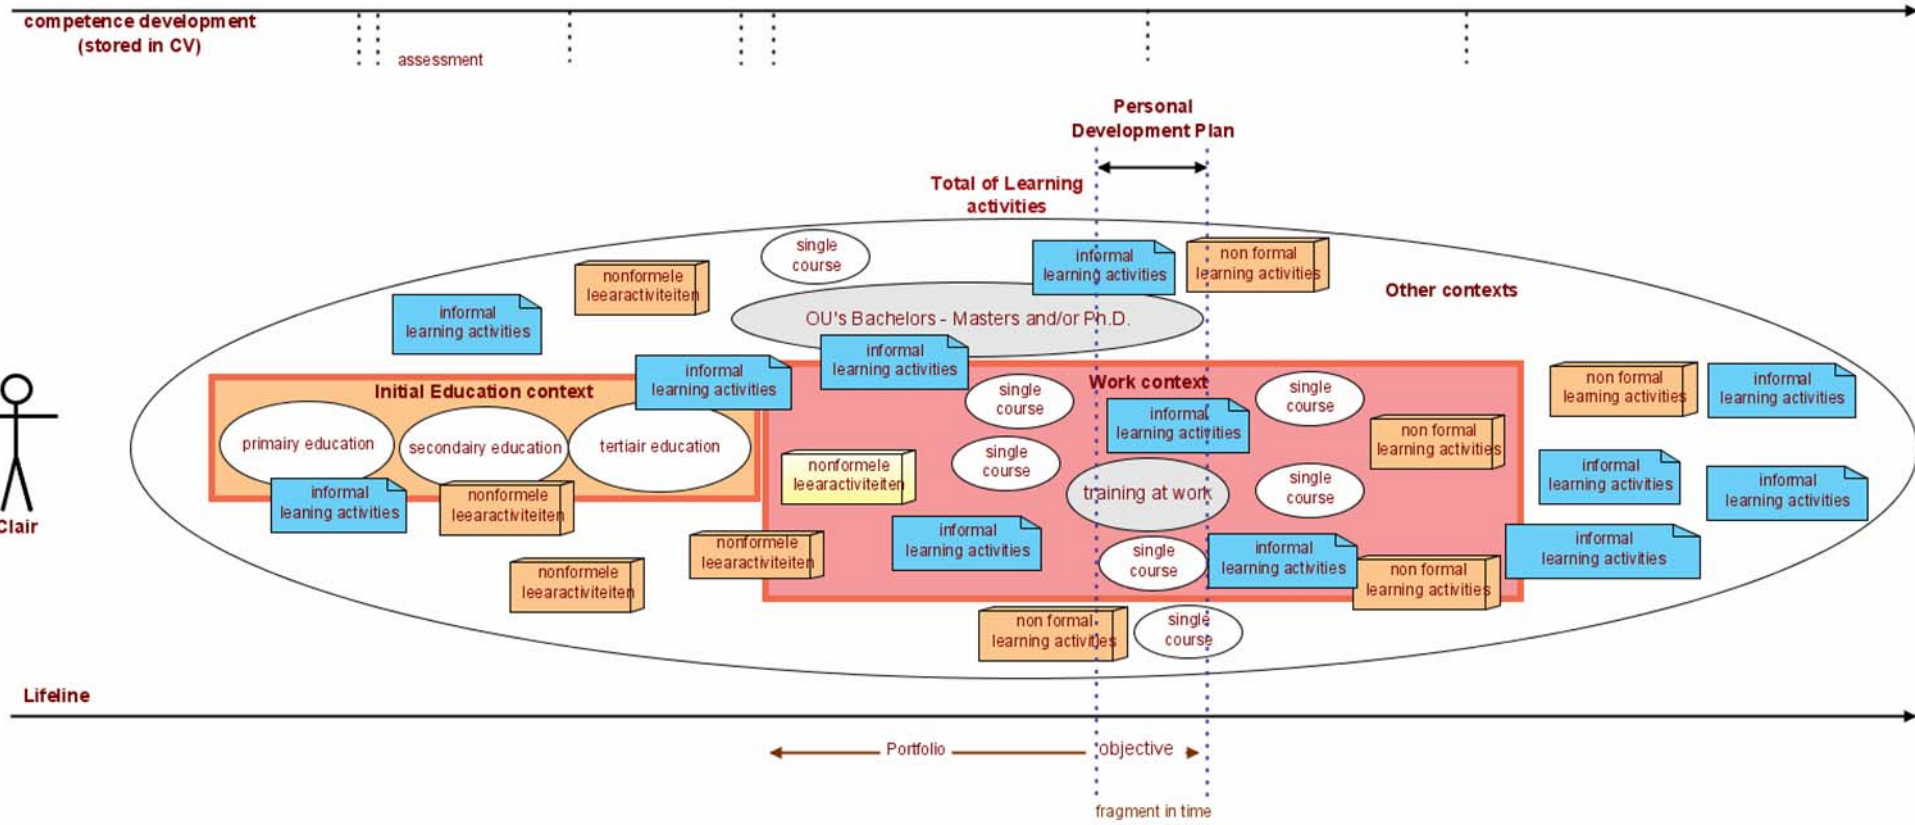

TEN Competence

Building The European Network for Lifelong Competence Development

Vision of the Project

Facilitate the development of the competences of individuals in different contexts (job, work, school, home) in various phases of life

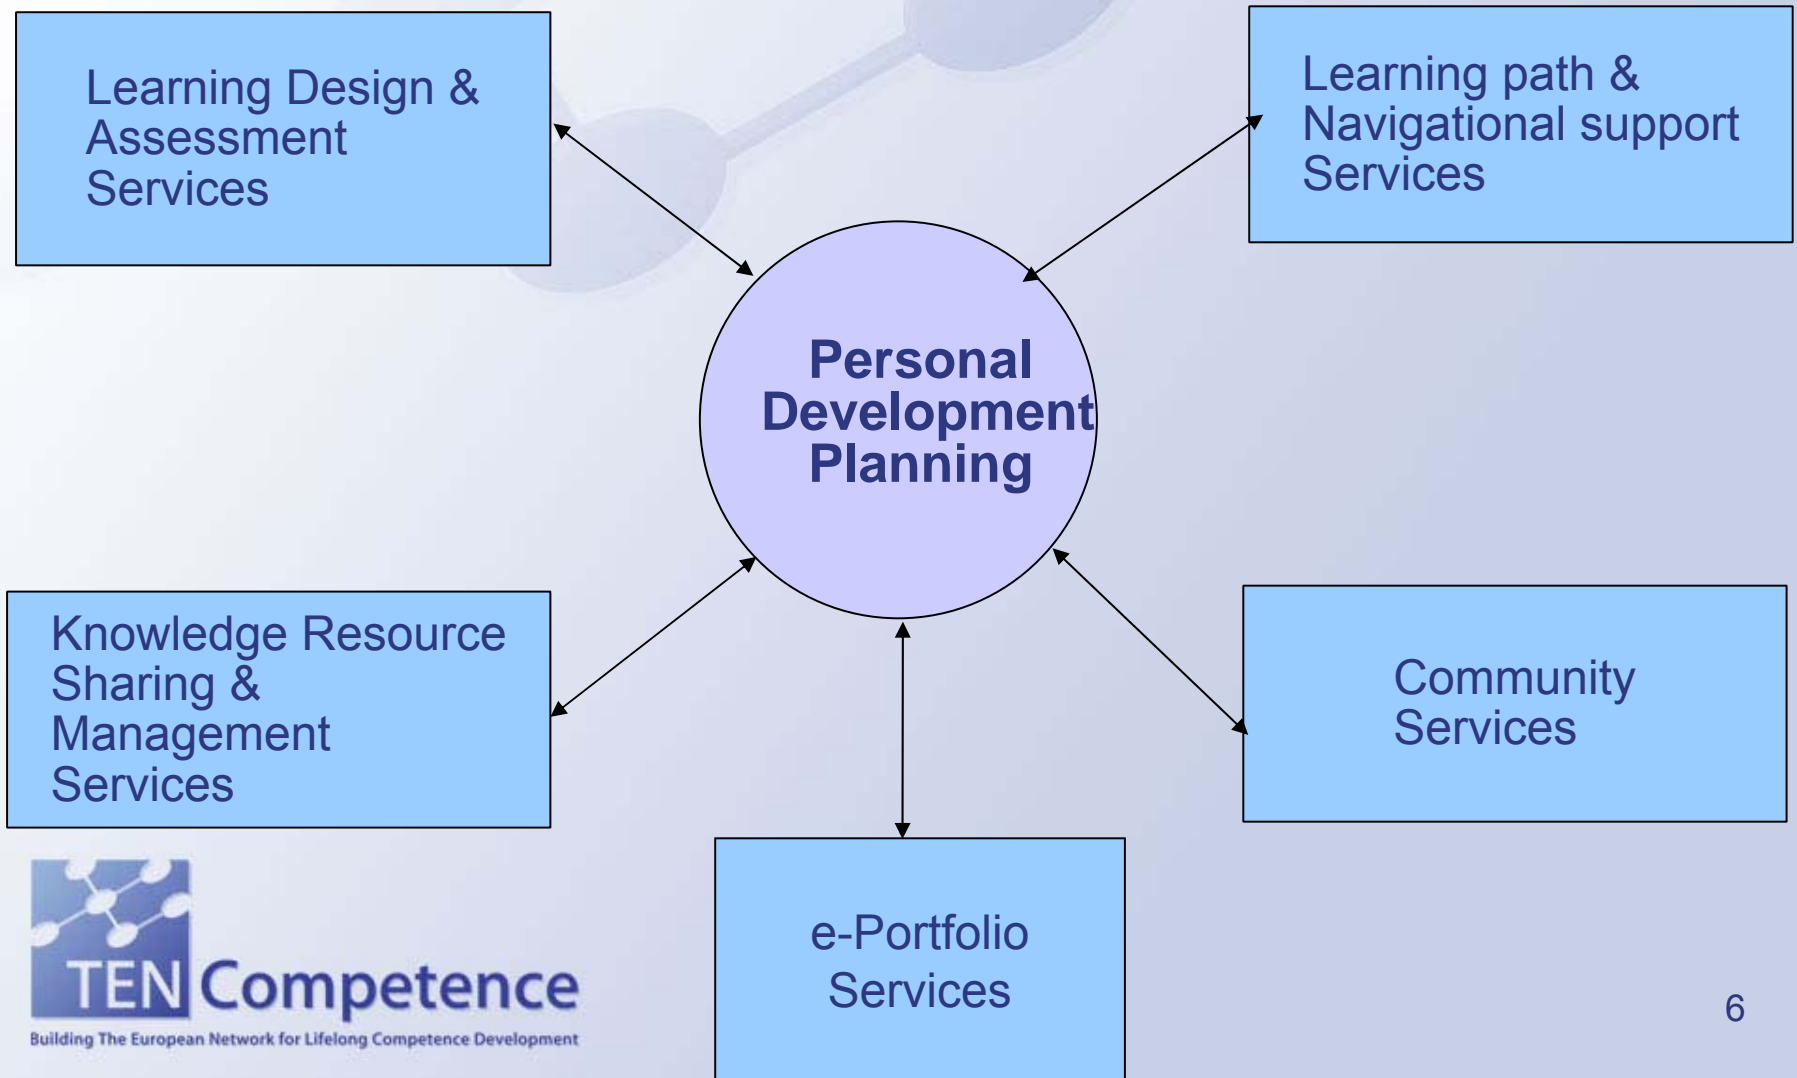

It is connected to lifelong learning, employability and personal growth

Use Cases

1. Want to improve a specific competence
2. Want to study for a new job
3. Want to keep up-to-date
4. Want to explore the learning resources, courses, people, etc. in a certain field
5. Want to assess my competences
6. Want to reflect on my competences (identify new goals)

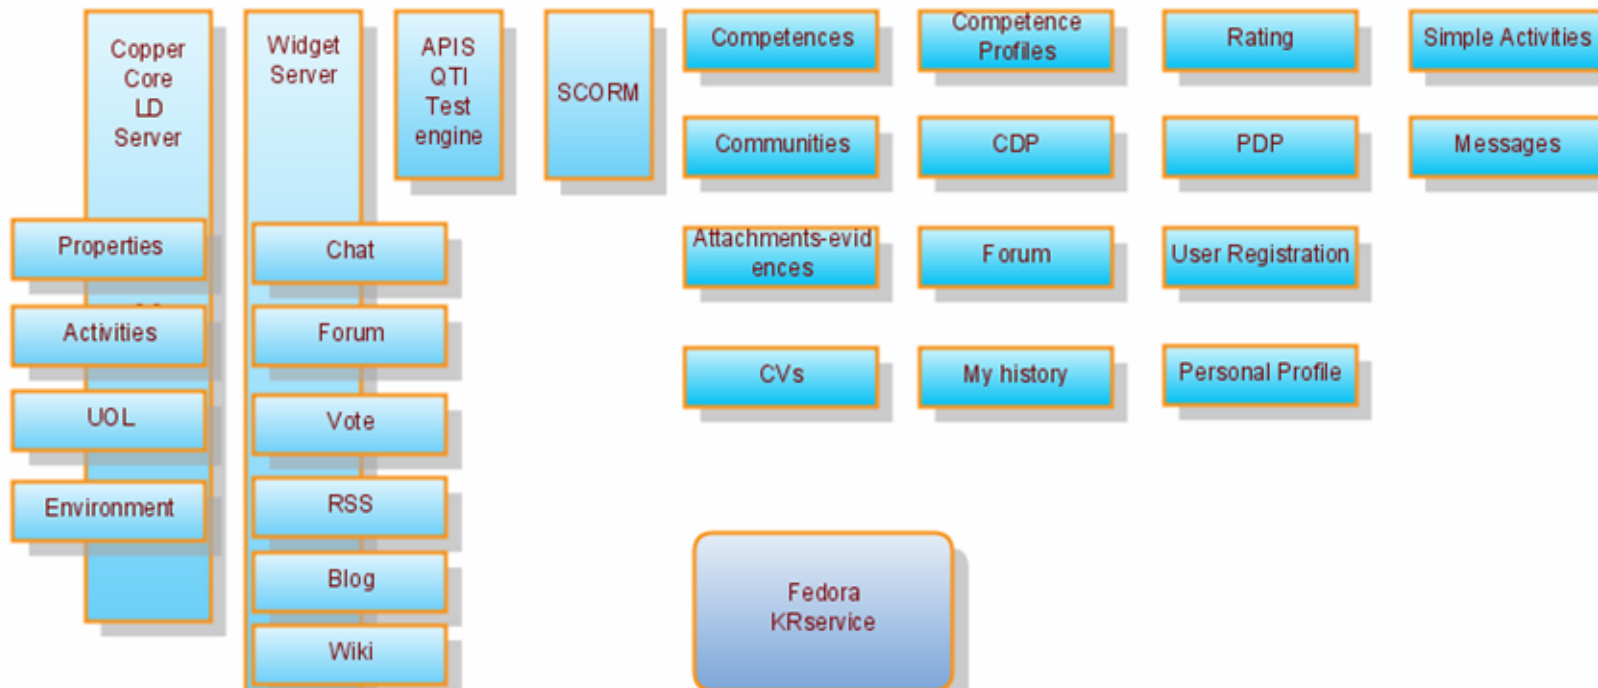

High level overview of connected services
