The dEUcert Project aims to promote and enhance ECQA Certification schema throughout Europe.

dEUcert is funded by the European Commission.

European Certification and Qualification Association (ECQA)

The ECQA is a non-profit association, joining institutions and thousands of professionals from all over Europe and abroad.

ECQA provides a world wide unified certification schema for numerous professions.
The same exam pool, exam rules and the same electronic exam system are used for certification exams in any participating country.

ECQA brings together experts from the market and supports the definition and development of the knowledge (Skills Sets) required for professions.
Experts, brought together in so called Job Role Committees, are initiating new professions and updating the existing professions as needed on the market.

ECQA defines and verifies quality criteria for Training organizations and Trainers to assure the same level of training all over the world.
The certification procedure offers modularity of certification therefore modularity of training all over the world should be assured. Only verified and approved organizations and individuals may become ECQA certified service providers.

ECQA promotes all certified professionals.
Databases of certified professionals are publicly available to help organizations on the market to seek other organizations and individuals for cooperation and collaboration.

dEUcert project objectives
The dEUcert project is aimed at the promotion of the ECQA certification schema.

Objective 1:
The **ECQA portal**, as the main reference point to all ECQA related information, will be improved and the content updated according to project results.

Objective 2:
Partners will develop **unified dissemination materials package** and translate it to local languages of partners (13 languages).

Objective 3:
Information about the ECQA will be **disseminated in all of the project partner's countries.**

Objective 4:
Regional ECQA promotion centers will be activated. Partners will act as regional centers for ECQA promotion and dissemination. They will use the translated dissemination packages to promote the ECQA on local area level (target group: 60.000 individuals). Partners will then research the interest of the local market about the use of ECQA service for existing and for new qualification schemes. Partners will develop a database of interested parties at a local market and integrate them on European level.
